RÉSUMÉ SYNOPTIQUE

DES TABLES D'ALYPIUS

Pour les trois Genres

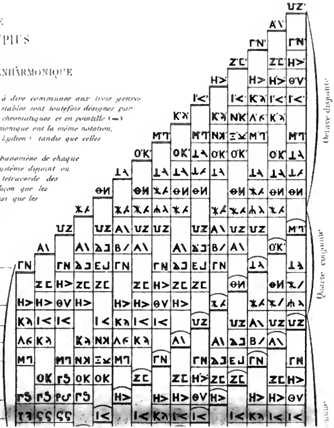

D'ATONIQUE CHROMATIQUE ET ENHARMONIQUE

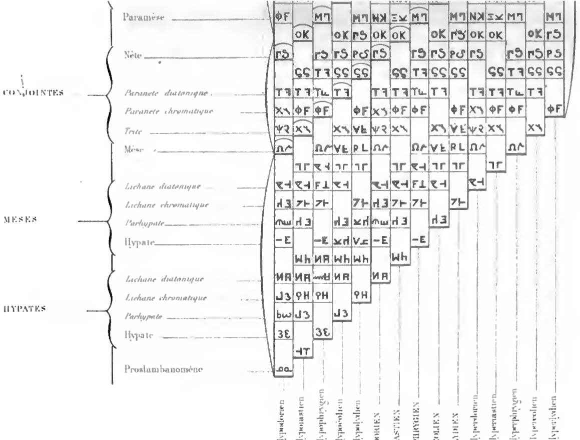

N.B. On a écrit en trait noir (▬) toutes les notes stables, c'est à dire communes aux trois genres ainsi que les Parhypatoïdes (Trites et Parhypates), qui sans être stables sont toutefois désignées par une notation constante; on a écrit en double trait (═) les lichanes chromatiques et en pointillé (┅) les lichanes enharmoniques. Le genre chromatique et le genre enharmonique ont la même notation, à cela près que les indicatrices du premier prennent un accent (trope Lydien) tandis que celles du second en sont dépourvues.

Le système conjoint ou variable est compris depuis la Proslambanomène de chaque trope jusqu'à la nète des conjointes inclusivement. — Pour avoir le système disjoint ou immuable il faut par la pensée, supprimer dans le tableau tout le tétracorde des conjointes en superposant la Mèse sur la Nète de ce tétracorde de façon que les doubles barres qui soulignent ces notes coïncident parfaitement ainsi que les arcs de cercle qui les surmontent.

HYPERBOLÉES — Nète — *Paranète diatonique* — *Paranète chromatique* — *Trite*

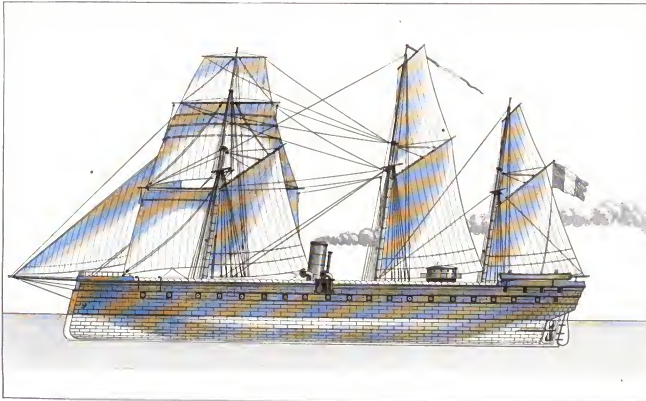

DISJOINTES — Nète — *Paranète diatonique* — *Paranète chromatique*
